
GLP2 Safety and functional tester

<http://www.whitelegg.com/product-search/glp2-safety-and-functional-tester>

A cost-effective, fully featured solution for testing the safety and function of a variety of electrical products. Designed for machine builders and OEMs, the Whitelegg GLP series is a simple to use fast and effective tool for benchtop or production testing.

- Very economic solution for fast, accurate and repeatable safety and function testing.
- Ideal for laboratory use, semi automatic production or integrated into an automatic production line.
- This tester is the easiest to program on the market, all via the easy to use touch screen.
- Up to 15 different test methods can be integrated.
- Feature packed with many ports for connection to ancillary devices, production machinery, networks etc.
- PC software available for data storage and report printing away from the GLP.
- Huge internal memory for test results and different test plans.
