

HHG Growlers

<http://www.whitelegg.com/products/electric-motor/electric-motor-rewind-and-repair/hhg-growlers>

High quality armature testiing

The hand held armature testers (growlers) are light weight and easy to use.

They detect shorts and open circuits in a wide range of armatures. Faults are indicated by green and red LED's in the handle and an acoustic indication.

They are made in two versions:

HHG1 which has a pole spread of 19mm.

HHG2 which has a pole spread of 9mm for smaller armatures

Both the above plug into a power pack:

HHG-PP230 for a 230V single phase supply or HHG-PP110 for a 110V single phase supply
