

Stator Holding Rings

<http://www.whitelegg.com/products/electric-motor/electric-motor-rewind-and-repair/stator-holding-rings>

Highly versatile range of manual and powered stator handling rings. Securely holds the work piece and allows easy access for coil and insulation insertion. Ideal for workshops and schools

Two plane movement

- Low cost option, screw or expanding fastenings
- 360 degree rotation of inner ring
- 3 versions in range

	SHR-01	SHR-02	SHR-03
Diameter of inner ring	200mm	350mm	500mm
Stator weight capacity	50kg	100kg	200kg

Three plane rotation

Superb advantages when coil inserting, insulating and switching. Note that the stator requires additional securing to the ring when rotated to the third plane to prevent slippage.

	SHR-04	SHR-05	SHR-06
Diameter of inner ring	200mm	350mm	500mm
Capacity	35kg	70kg	150kg

Two plane rotation

- Consisting of base frame with revolving table and ring.
- Any desired position can be achieved
- Excellent time saving device-no need for wooden spacers
- Motorised versions also available for stator weights up to 4000 kg

	SHR-07	SHR-08	SHR-09-Electric	SHR-10-E
Diameter of inner ring	700mm	1000mm	1400mm	1800mm
Capacity	500kg	600kg (750kg with electric turntable, 3,000kg with reinforced version)	1,000kg (3,000kg with reinforced version)	1,200kg with electric turntable (4,000kg with reinforced version)
