
WBW- High Precision Butt Welder

<http://www.whitelegg.com/products/wire-forming/wire-forming-welding/wbw-high-precision-butt-welder>

For High Precision Welding

- Can be fitted with special equipment for welding stainless steel
- Pulse weld controls with program storage
- Very strong welds with minimal or no upset
- Full time control of all pneumatic sequences for a fully flexible solution
- Designed for more demanding applications where no weld upset and yet very strong welds are required.
- High precision PULSE WELDING included as standard. Up to eight different weld programs.
- Pneumatic clamping and weld upset.
- Foot pedal operation.
- Full control and adjustment of all machine operation times.
- Optional system for welding stainless steel with no requirement to de-burr.
- Wire Range: 1.5-6.0 mm mild/stainless steel

This technology can be fitted to our CFM range of fully automatic wire forming and butt welding machines for the production of frames and rings.
