
Commutator TIG Welder - Vertical

<http://www.whitelegg.com/product-search/commutator-tig-welder-vertical>

Representing the very latest technology, processing enhancements and safety features, the TIG Vertical represents the pinnacle of commutator welding

- Completely enclosed welding operation for safety
- Monitoring of the working area via magnifying camera and LCD screen
- Micrometric positioning of the welding torch
- Stepper motors used for very accurate positioning
- Constant cleaning of the weld area via brushing unit
- Powerful fume extraction ensure operator safety
- Superb control of the weld finish with spot, long spot and bar jump programs to suit every commutator
- Three models in the range

	Model 60	Model 900	Model 1500
Armature core diameter	80-600 mm	100-900 mm	150-1500 mm
Commutator riser diameter	0-500 mm	100-1000 mm	120-1400 mm
Commutator riser height	0-200 mm	0-200 mm	0-250 mm
Shaft length	500-1600 mm	700-1800 mm	750-1950 mm
Max armature weight	2500 kg	4000 kg	5000 kg
Number of bars	0-999	0-999	0-999
